Professional Experience

Freelance Front-End Developer

September 2015-December 2021

Clients served: uStadium, NLM Marketing, Plum Direct Marketing, Method Savvy, Holly Springs Photography

- Created front-end websites for several clients and companies to launch their brands, delivering high-quality results, ending with 100% successful client-business relationships.
- Worked for over 5 clients, and 3 companies, and completed over 15 different projects using front-end and integration technologies.
- Created dynamic responsive web applications for clients using HTML, CSS, and JavaScript, resulting in improved user ability and user experience across all platforms and browsers.
- Customized WordPress sites using PHP, ensuring cross-platform compatibility and mobile-friendly, resulting in a 100% client success rate.

- Communicated closely with clients to uncover business requirements, provide technical requirements and roadmaps for work, completing projects on time and under budget.
- Collaborated with other developers and designers to build, deploy, and test responsive and mobile-friendly websites, with proven user ability, resulting in successful projects generating revenue for the client companies.
- Developed database architecture, web apps, browser extensions, and other user-facing components to ensure user-friendly experiences and store information seamlessly.

Infosys Raleigh, NC

March 2022 – Present

System Engineer

- Communicated with Field Technicians resolving work orders and service installation issues that led to customer satisfaction.
- Configured and customized the ServiceNow platform to meet business needs.
- Assisted with implementing and maintaining ServiceNow applications, creating workflows, and providing technical support.

Additional achievements:

- Created a custom-scoped application in ServiceNow where people can post garage sales in their city. The custom application implements the user administration where groups and roles are created for specific individuals to run and control the app.
- Developed an online trivia game based on YouTube videos using Ruby on Rails. The scope of the game application is to ensure that a user can log-in / log-out, create account, become a player, and answer trivia questions.
